

## QUALITY, ENVIRONMENTAL AND HEALTH AND SAFETY MANAGEMENT SYSTEM POLICY

Recymet Systems S.L. is an authorized waste manager, dedicated to the recovery, valorization and commercialization of industrial scrap of special metals, in all its formats and physical states, with service throughout the national territory and international projection. Therefore, our Quality, Health and Safety and Environmental Policy is based on:

### **TARGET**

To keep our **leadership** position in the sector, maintaining the **quality** levels of the materials that we value, as well as **continuous improvement and integration** in the management of our processes, products and services, complying with all **environmental and health and safety regulations** for achieve the satisfaction of our business partners, employees, interested parties and society in general.

### **VIEW**

The improvement of **productivity and competitiveness**, through the optimization of our processes, are essential to continue growing; the commitment to provide the **necessary endowment and resources** to achieve the objectives established in our integrated management system, the training and development of our **work team**, their protection with health and safety working conditions, together with the reliability of our assets, information, internal and external communication with protection of intellectual property and personal data, as well as awareness of environmental aspects related to its activity, are key in achieving the objectives.

### **VALUES**

This requires the establishment and integrated consolidation of a Quality, Health and Safety at Work and Environmental System based on the following values:

- **Full satisfaction** of customers and suppliers, trying to meet their requirements and respond to their needs and expectations.
- **Strategic vision** of the risks that may influence our organization in order, with their analysis, to manage them and thus guarantee the continuity of our activity.
- **Continuous improvement** as a strategic value is applied to all aspects of the management of our company, bearing in mind the life cycle of the materials we manage.

- **Protection of people's health**, workplace and collaborators. Legal prevention, removal of hazards and risk reduction at work for all processes and activities as a priority line of responsibility. Promotion of education, training, information, communication, dialogue, participation and accountability in all directions, for the execution of operational tasks.

Therefore, Recymet Systems, S.L. maintains an integrated Quality, Environmental and Health and Safety Management System at its Rubí, Amorebieta and Alcalá de Guadaira sites, in accordance with the requirements of the UNE-EN-ISO 9001: 2015 + ISO 14001: 2015 + ISO 45001 Standard : 2018, striving to continuously improve their efficiency.
